

WE'RE ALL CONNECTED THROUGH RESILIENT NETWORKS.

NETWORKING
ADAPTIVE INFRASTRUCTURE

Modern business requires reliable and transparent networks. Over time, networks can easily become neglected, putting the business at risk for unplanned downtime or risking their security posture. Advizex Networking solutions can help design, implement, and manage your network regardless of its current state.

Tap Into Our Core Services.

- **Network Assessment:** best practice assessment, gap analysis, strategic planning
- **Data Center Networking:** core routers, next-generation firewalls, load balancing, migrations
- **WAN Networking:** core to MPLS/SDWAN routing, design, service-provider migrations
- **Branch/Remote Networking:** site turn-ups, refresh
- **Wireless Networking:** predictive surveys, planning, controllers and APs, physical site surveys
- **Network Access Control:** protection for wired, wireless, and guest access

Call Advizex When You Need Experience In

- Core/closet networking

This Isn't Just About Technology. It's About You.

Technology on its own doesn't enable business success. It's about choosing the right solutions, integrating them into your systems, and using them correctly that helps ensure your success. The Advizex Network Professional Services can help you achieve that goal.

Services include:

- Routing and switching
- Wireless networking
- Next-generation firewalls
- Load balancers
- Network Access Control (wired and wireless)

Networking Services Include:

- ✓ Assessments
- ✓ Design
- ✓ Implementation
- ✓ Custom Scoping
- ✓ Planning Services
- ✓ Design & Deploy
- ✓ Managed Services
